# Vehicle Development Technician

Take your interest in the automotive industry to the next level with Macomb's Associate Degree in Automotive Technology – Vehicle Development Technician.

Macomb's Vehicle Development Technician program uniquely blends aspects of mechanical, electronic and software skills to give you an expertise specifically designed to work in the engineering and development areas of automotive industry.

Vehicle Development Technicians work on teams that:

- Develop the next generation of safe, efficient and intelligent vehicles
- Work on electronic and network components
- Set up experimental testing
- Manipulate systems for prototype vehicles
- Acquire and report critical data sets

The automobile is becoming an increasingly complex product with most systems becoming electromechanical devices controlled by a computer. For technicians working on these vehicles a new versatile skill set is required. Auto companies and suppliers are looking for a combination of technical skills for product development in automated/connected vehicles and experimental vehicle testing.
